026 EUROPE SUMMER

INTERACTIVE ICONS

This catalogue is jam packed with digital features, including slideshows, videos, pop up tech features and more. To help you navigate the catalogue we have included intuitive icons wherever more information or imagery is accessible.

POP UP

This icon indicates a pop up window that will display more information / images.

SLIDESHOW

Clicking this icon / the image attached to it will bring up a slideshow of related imagery.

VIDEO

This one is straight forward, clicking this icon will play a video.

FEATURES

These icons will give more information on the product when clicked. You will find product specifications under these icons.

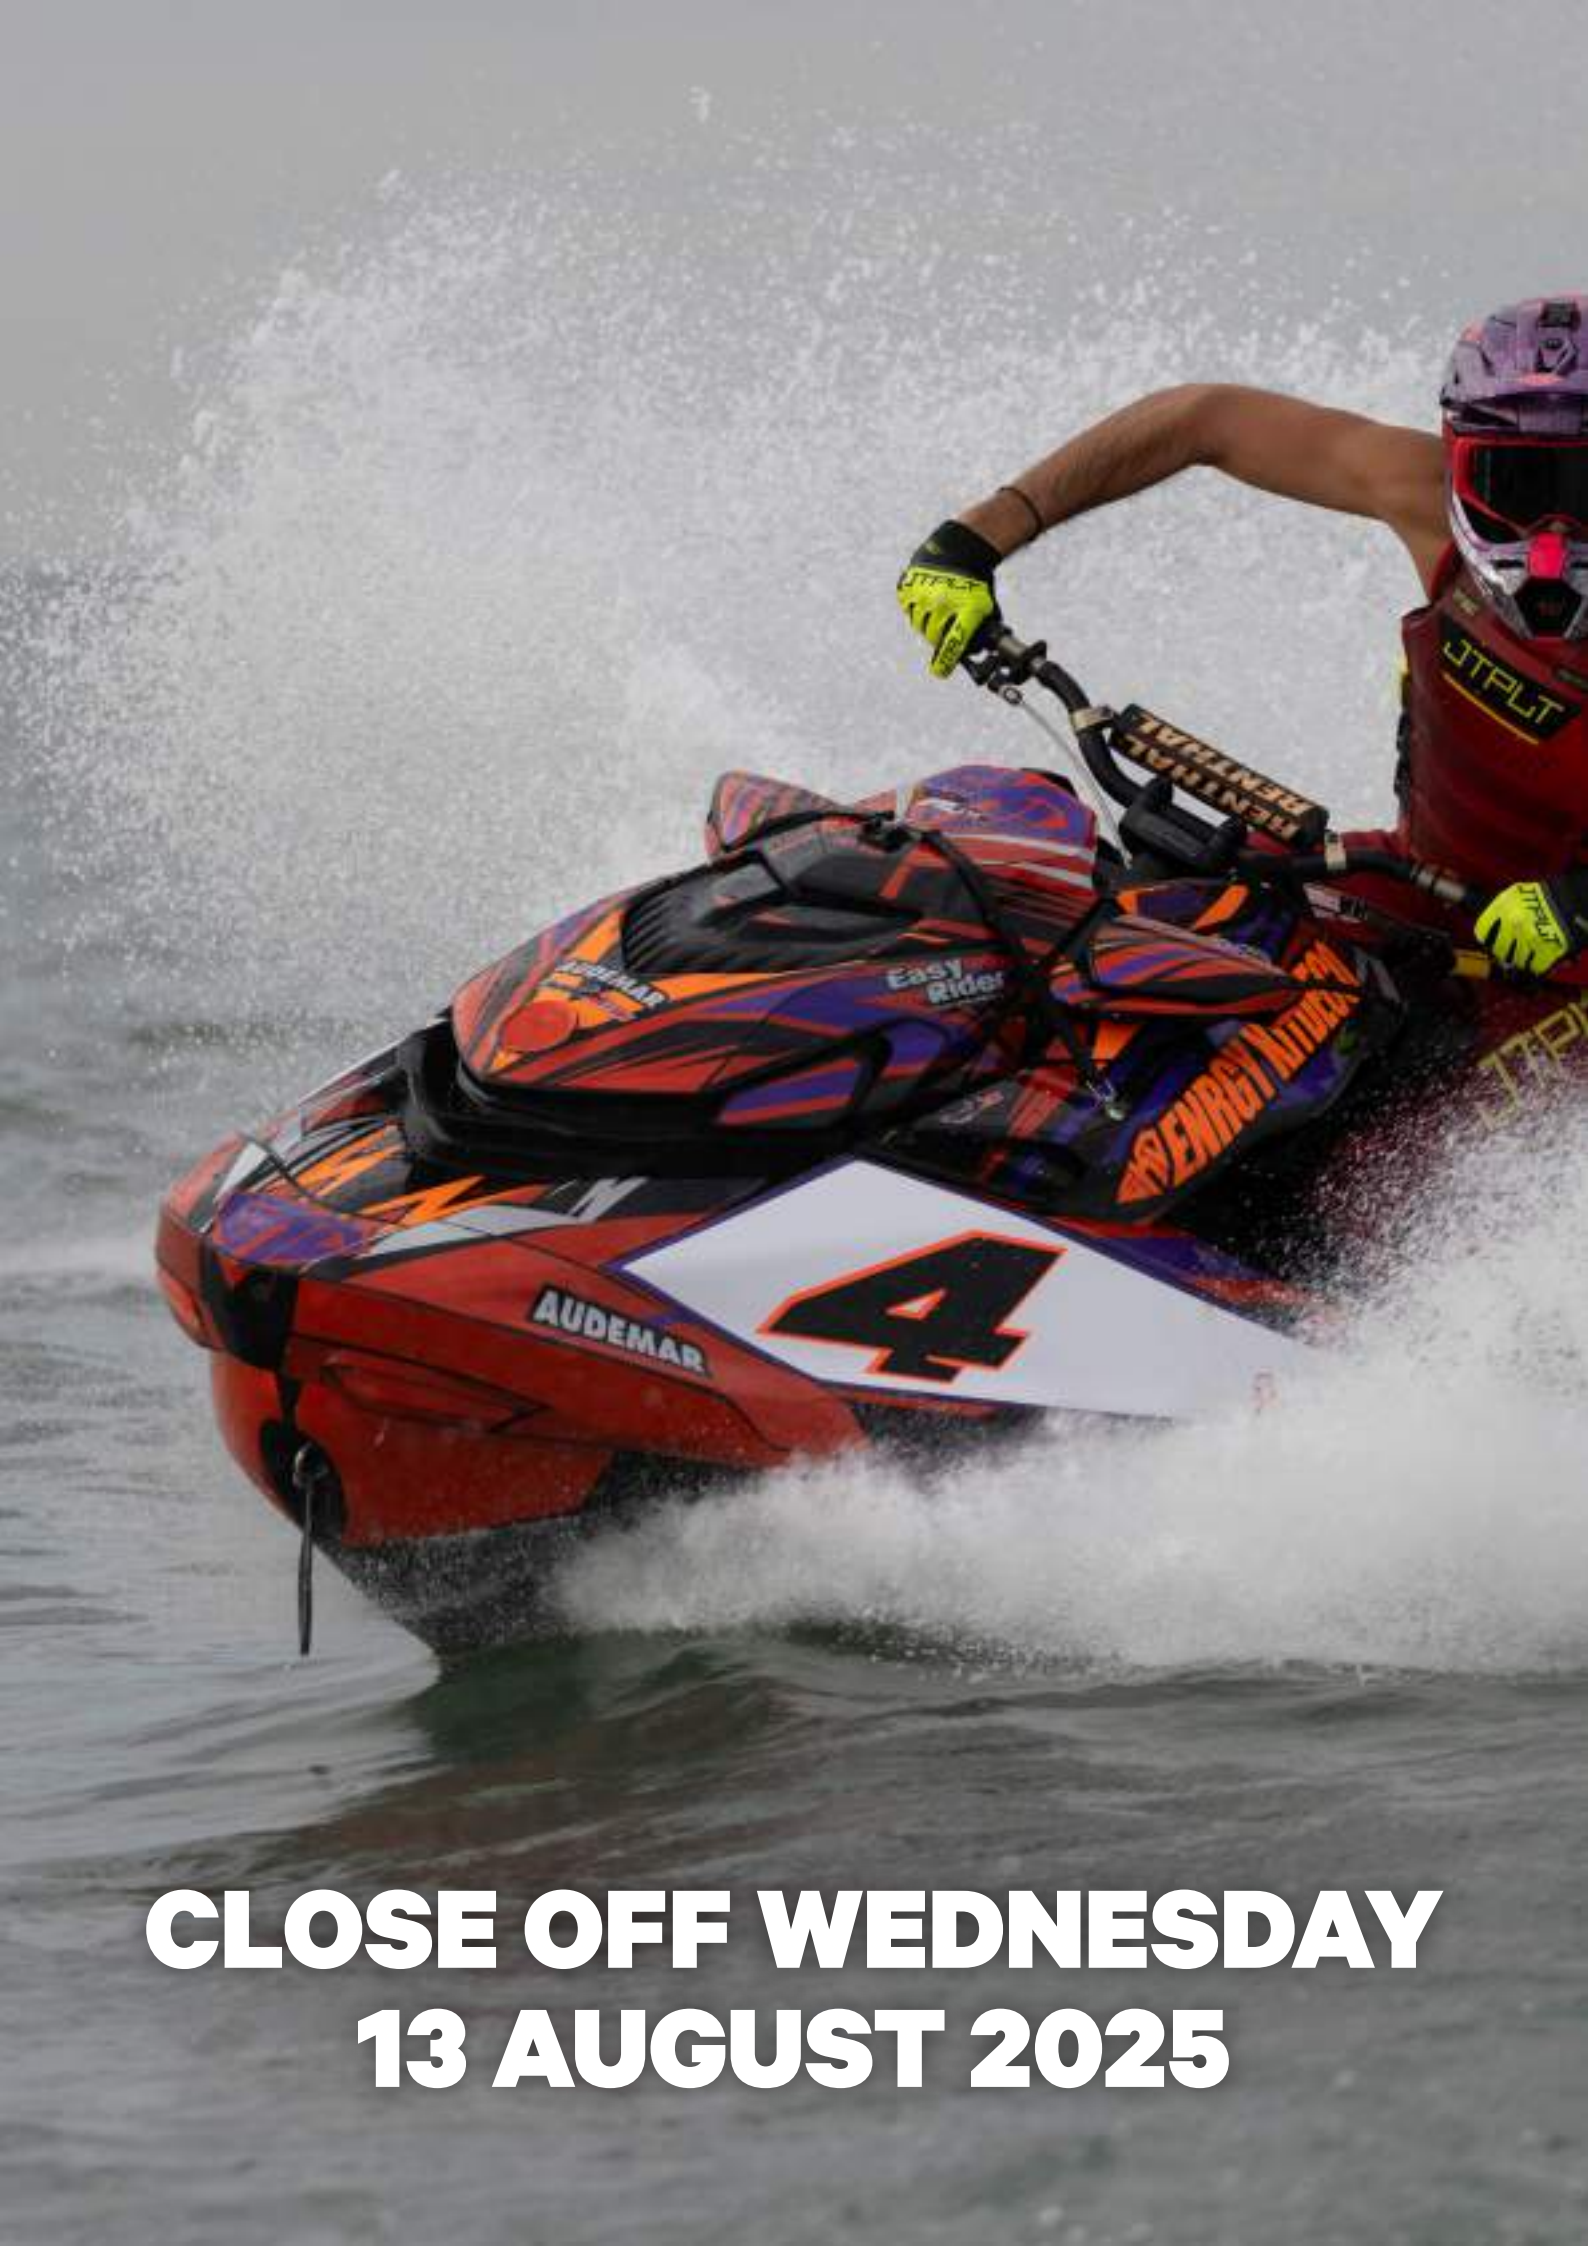

SLIDESHOW CONTROLS

You will see these controls on embedded slideshows. These slideshows will automatically change, but you can use either the arrows or circles to navigate immediately.

13 AUGUST 2025**

WELCOME TO SUMMER 2026

It seems like only yesterday that we were presenting the 25 range, and yet here we are, setting the stage for Summer 26. Each year seems to go by a little bit faster, which only makes it even more important to savour those special moments.

Whether you've just bought a new jetski and are heading out for the first time, or the 1000th time, learning a new wakeboard trick or simply just having a BBQ by the waters edge, these are the moments that are truly special and what makes us strive to create the best gear to help get you there.

This year we have taken yet another step forward with our range.

We say it every year, but this is the best range we have made.

We have developed, in

partnership with Fidlock, the ultimate PWC Venture Plus jacket, with a built-in waterproof pouch. This thing has all the bells and whistles and is truly the swiss-army knife of life jackets.

We have taken yet another step forward in our Pro-Tech range, offering hip protection in our Vault Johns. Our Vault athletes are getting faster and faster each season, and we are working hard to keep up, to offer them the absolute best in protection and functionality.

In collaboration with Paddle Pal, we have developed a new youth jacket. Every time we have tested this vest, the kids always refuse to take it off.

These are just a few of the new items that we are so excited to show you, along with an all-new wake range and even some new blocks, there is something for everyone in the Summer 026 range.

TECHNOLOGY, INNOVATION & PATENTS

We innovate to make life more fun. We create functional designs and we protect our innovations to create sustainable products. We seek to continuously improve our products through our community to work towards delivering best in class products.

This year we have developed a new stitch through design in our wake vests (Aurora and Youth Freeride). We have used this technology in our European range for years, but finally have developed it for the Australian Standards as well.

We have also developed removable hip protection in our Vault Race Johns, allowing an extra level of protection without adding any more bulk.

We always keep functionality and design in mind when creating new products, but safety is always our number 1 concern and all of our products meet or exceed safety standards.

STITCH THROUGH THIN PROFILE DESIGN

**SAFETY IS OUR #1
PRIORITY**

We have developed many different sustainable programs over the years with all of them leading back to our core fundamental - the Jetpilot product lifecycle.

The apparel industry is responsible for 10% of annual global carbon emissions.

That is why we create products that are built to last, doing our part to help reduce waste and items ending up in landfill. From our manufacturing processes to our

packaging to our end product, we make the conscious effort to ensure we are reducing our carbon footprint where possible.

We have developed a new type of neoprene, called Ecoprene. Made from recyclebottles, this material is 30% lighter than traditional neoprene and has more stretch. Used in over 50% of our life vests, ecoprene is fast becoming the go-to material for a large portion of our consumer base.

We have been using limestone neoprene in our wetsuit products

for years now. Made from using limestone, instead of petroleum, in the production of the material, this neoprene has a significant lower impact on our environment, without sacrificing any of the benefits from the final product.

We have also started utilising RPET (recycled polyethylene terethylene), recycled plastic bottles, in all of our drysafe bags. This program reclaims plastic waste and is re-constructed into a strong and waterproof material that will last for years.

TBJ

TOMMY, BENNY AND JAKE

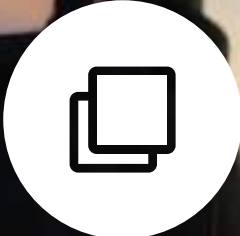

Three brothers from Perth, WA that are absolute frothers. Not only do they rip on a wakeboard, but they are some of the nicest and friendliest guys you will ever meet, and their stoke is contagious.

We have collaborated with the boys to create a fresh new design perspective for 2025. We really admire their connections, not only to each other but to the water and all the values that we strive for as a business - creativity, ingenuity and authenticity.

We've been huge fans of these boys for years now and it is about time that you become one as well.

CE PRO TECH

JETPILOT **INTERNATIONALLY PATENTED** **INDUSTRY LEADING RACE PROTECTION**

Introducing our Patented Built In/ Removable Pro-Tech Level 2 CE Back Brace, engineered with three-tiered protection layers for optimal rider safety. Crafted to meet the PWC race standards of IJSBA and UIM Aqua Bike, our Pro-Tech CE Back Brace is a testament to our commitment to being the leaders in World Champion Race Technology. Designed to integrate with our RX Vault collection of life vests, this back protector sets a new benchmark in protective gear.

Certified to CE Level 2, our back protector doubles the level of impact protection, effectively halving the force hitting the body to below 9KN compared to the 18KN threshold of Level 1 certification.

The outer exoskeleton shell system is crafted from high-density polypropylene plastic, it acts as a

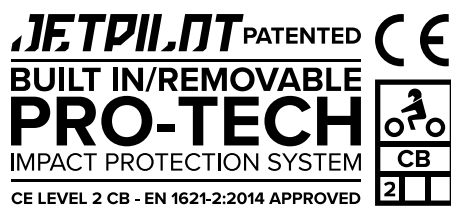

first layer of defence which ensures the initial force is deflected away, sparing you from the brunt of the impact. Meanwhile an internal dual foam construction, combines an EVA layer with a XPE foam backing that is reinforced with closed foam cell technology.

These layers work in harmony through the compression and deformation of cell walls, the exoskeleton shell flexes and bends to seamlessly deflect and distribute energy, ensuring a resilient shield against impact on the water.

Meticulously race engineered and tested by world-class PWC riders for unrivaled safety and comfort, we prioritise rider feedback, refining our product to meet the highest standards, ensuring you navigate the water with confidence.

DIY Custom VEST PRINTS

Non Melting Heat Transfer Proof Foam Technology with High Bond Custom Number Panel

We have designed a new foam that allows our customers to easily apply custom race numbers and names. With a higher melting point than traditional materials, it allows heat press transfers without affecting the buoyancy of the vest. We have also placed an Ecoprene panel on our side entry vests to allow better application of the heat transferred prints.

HIGHER MELTING POINT TECHNOLOGY

Allows for perfect heat transfer prints.

MXSTORE
COMAU

Although any heat transfer printer will be able to customise your vest, we recommend MX Store. We have used them for previous projects and have always had amazing customer service as well as prompt and professional outcomes.

FIDLOCK

MAGNETIC SELF-SEALING TECHNOLOGY

With over 700 patents in over 100 patent families, spread across 28 countries, Fidlock is the trusted name in innovation. One of these many patents, is their Hermetic range.

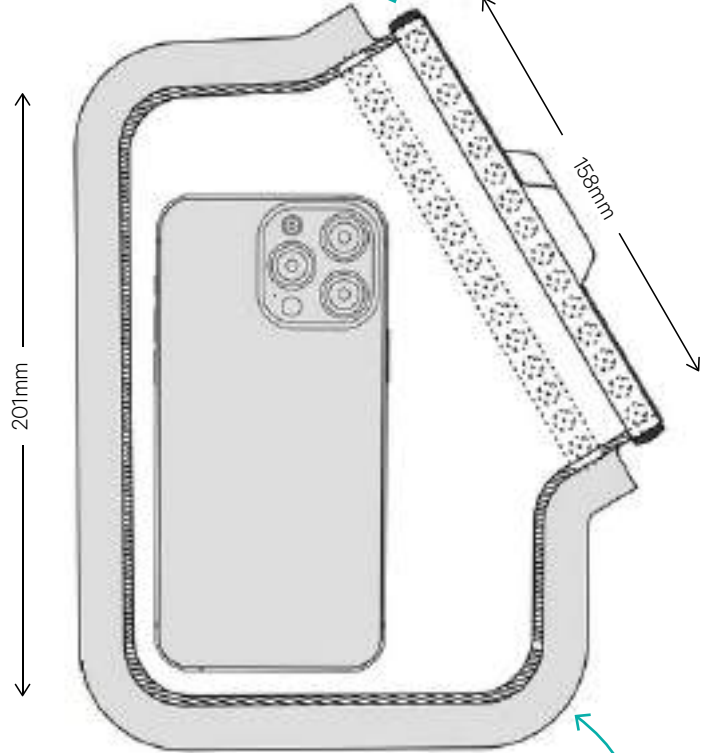

Thanks to the patented **Gooper technology**, this is the first magnetic, hermetically self-sealing waterproof pocket, that keeps your valuables dry while you hit the water. On top of that, the "**Just-let-go**" automatic seal prevents false closing and will reliably snap shut.

CE STANDARD EN 1621-1:2012 LEVEL 1 

THE NEXT STEP FORWARD IN PROTECTION

We are continually innovating and developing new products to not only enhance your performance but also keep you safe.

Our industry first, removable hip protection, is the next step in our Pro Tech series. With built-in pockets, inserting and removing the hip protection takes only a matter of seconds, so you can go from lounging in the sun to race ready whenever you need.

All of our products are tested to strict safety standards, and the hip protection is no exemption.

Built tough to withstand the CE Standards testing, we are proud to boast a Level 1 rating, under EN 1621-1:2012. In simple terms, you can rest assured that our hip protection is working hard to help keep you safe on race days.

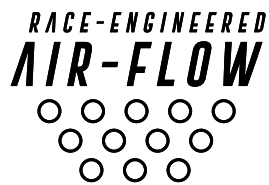

Combined with our removable back protector, our latest innovations are paving the way forward for race safety. We are the trusted name in safety and we will always push ourselves to create the best gear, so that you can feel confident out on the water.

CONEHED TECHNOLOGY™

Conehead Technology™ allows us to build a lightweight helmet with a more comfortable feel, without compromising your safety.

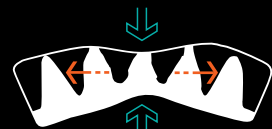

IMPACT

HEAD
0ms

Impact force directed towards head.
Head pushing in opposite direction.

IMPACT

HEAD
6ms

On impact the cones compress, directing the energy and force sideways within the foam. As the base of the cones compress, they gradually slow down the head.

OUTCOME

Impact force directed towards head.
Head pushing in opposite direction.

PERFORATED AIRPRENE

Internal padding has been ergonomically designed to keep your head safe in advanced comfort. Our Perforated Airprene liner increases water release and draining, reducing drying time.

RACE-ENGINEERED AIR-FLOW
