Cruiser Shore power

Marine plug and socket for 16A/32A - 230V shore power cord.
Simple and compact design for easy installation in any place of the cockpit
In compliance with the IEC 60309-5 European safety standards.

16A / 32A **IP67** **IEC 60309-5**
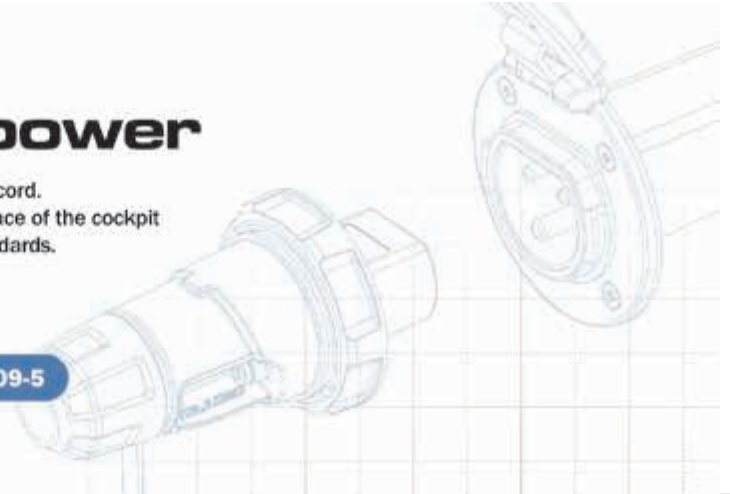

OSCULATI

Cruiser 16A socket and plug

16A	IP67	IEC 60309-5

Marine plug and socket for 16A - 230V shore power cord.
Made of PA6, fitted with high energy efficiency contacts and IP67 cover.
Plug designed for ergonomic grip, fastened to the boat socket through a rotating bezel. IP67 watertight closure. A rubber cap ensures IP44 tightness when unplugged.
Simple and compact design for easy installation in any corner of the cockpit
In compliance with the IEC 60309-5 European safety standards.

Cruiser 32A plug and socket

32A	IP67	IEC 60309-5

Nautical socket and plug for 32A - 230V shore power cable. Made of PA6, equipped with high energy efficiency contacts and an IP67 closure cap. The plug is designed to ensure an ergonomic grip, and the rotating ring allows it to be securely fastened to the boat's socket with an IP67 watertight seal, while the rubber cap ensures an IP44 seal when not connected. The clean design and compact dimensions allow for convenient installation of the socket anywhere in the cockpit. Compliant with European safety standards IEC 60309-5.

Retractable electric cable

IP44   **AISI 316**   **AUTOMATIC ROLLABLE**

Innovative electrical cable dock system. Hull hidden installation.
Thanks to an automatic retractable dispenser the electrical cable is drawn from a box and directly connected to the dock pillar.
To stow the cable, just unlock the seal and wait for the retractor to automatically rewind the extracted cable.
Once the cable is stowed away, the system disappears inside the hull into an elegant mirror-polished stainless steel box that ensures IP44 airtight seal.
The alignment between the winder and the bush can be oriented in any direction with a maximum recommended angle of 80°.
Available in two versions with different cable capacities of 16A and 32A.
Internal winder supplied with adjustable mounting brackets.

Waterfall skin fitting/drain well for transoms

REGISTERED DESIGN | **13° INCLINATION** | **FAST INSTALLATION** | **ISO 9093**

This system ensures the following advantages in a single product:
• Easy installation (1 operator only)
• Pre-assembly of the gate valve and hose holder at the workbench (threaded version)
• Locknut for positioning the gate valve in the desired position (threaded version);
• Drainage without unwanted siphon formation thanks to 13° inclination
• Integrated non-return valve in case of reverse
• Stainless steel finishing without visible screws.

Assembly sequence:
• Workbench pre-assembly of gate valve and hose holder (option to choose valve handle positioning)
• Insertion of the pre-assembled module from inside (optional pre-fixation with self-tapping screws from inside) - end of internal installation;
• Screw tightening of the final fixing nut from outside
• Cutting of the exceeding part
• Non-return valve plate mounting;
• Stainless steel finish clip mounting.

▲ Fully flush when not in use

Stainless steel toggle fastener suitable for trunks and hatches

FULLY FLUSH OPEN AND CLOSE

Mirror-polished AISI 316 stainless steel lever closure, designed to fit various applications and ensure the closure of any hatch.
The locking pin with eccentric hole can be rotated to achieve the desired closing tension.
Once installed, the device has a flush design with ergonomic handle for easier use.
When open, the closing hook rotates at 180° and doesn't exceed the handle overall dimensions thus preventing to be hit by mistake.
It includes a PVC template for easier installation.

| Code	←→ mm			Screw size
	A	**B**	**C**	
38.213.00	80	26	13	M4
38.213.01	100	32	16	M5

① Use the template to hold the base in the open position, and mount the body with two screws.

② Insert the template on the front of the body.

③ Mark the hole for the latching pin.

④ Install the latching pin and turn it for the desired tension.

OSCULATI

Specter foldable step

MAGNETIC LOCK

Code   59.807.00

Wide foldable step with non-slip grip made of CNC machined aluminum.
Bright silver anodized finish.
Magnetic closing and locking system.
EPDM gasket for closure cushioning.
The step can be attached to the mast or any flat surface using 2 M6 screws (not provided)
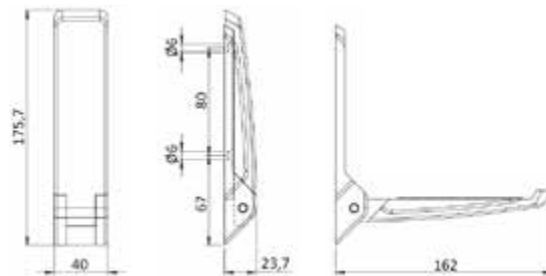

OSCULATI

Recessed bushing for carbon pole with hinge cover

Made of stainless steel with locking hasp and staple, locking seal and mounting counterflange - 46.814.90.
Water drainage setup for a Ø 12 mm pipe, including mounting counterflange (code 46.814.90).
The closure discreetly protects the glass when not in use.
It is possible to customize the cap with a logo upon request.

Mounting base on stainless steel pulpit Mickey system

OSCULATI

Code   46.825.10

Stainless steel AISI 316 bushing to be fixed where the pulpit crosses the support arm (to prevent bushing rotation).
Adaptable to pulpits with diameters from 30 to 34 mm and support arm diameters from 25 to 28 mm.
Accommodates a pulpit joint angle from 90° to 45°.
Designed with a 15° angle towards the bow or stern and a 12° outward tilt of the vessel to create a self-tensioning system and maximise the size of the awning (Screws included).
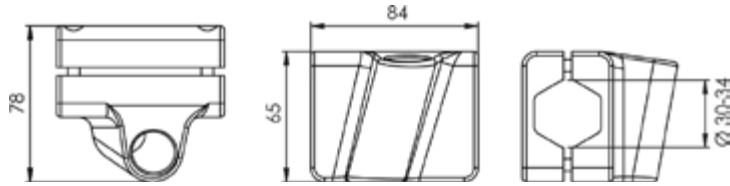

Bow roller + Trefoil® anchor with anti-water plate

OSCULATI

AISI 316   **SELF LAUNCHING**

Bow roller for anchor with coupling plate for perfect closure of the hull hole. This system makes the plate strike against the roller preventing water from leaking into the forepeak. The roller is designed to match the Trefoil anchor for a combination of high-level products in style and performance. The system can be easily installed by 4 studs behind the roller and is fitted with two sheaves for smooth sliding of the chain. Entirely made of mirror-polished AISI 316 stainless steel. It is recommended to install it on the chain by means of the Twist joint 01.738.01. Windlass ideal pull angle at 5° / 20° from the roller horizontal axis.

LEWMAR retractable thruster systems

LEWMAR®

The range of Lewmar retractable thrusters has been developed in collaboration with shipowners, following their requests and needs. The installation process has been studied in detail while maintaining the typical elements of Lewmar TT thruster series. Our thrusters provide the same pull in both directions to ensure maximum control and maneuverability. The entire series has been repeatedly tested to guarantee efficient, reliable, and easy-to-manage operation.

NEWEST
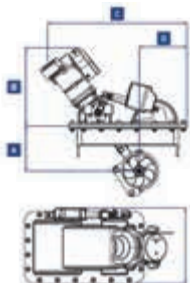

LEWMAR retractable thrusters

The patented "shortened pin" system minimizes inside space requirements but allows for maximum water exposure of the propeller.
It comes with a a fibreglass flange for easy installation on all sizes to be adjusted according to the hull shape.
Fibreglass sturdy construction.
Automatic self-retraction after 5 minutes inactivity.

High tenacity Kevlar® and polyester double braid

Braid peculiarities: extremely high breaking load, excellent mechanical performance and extremely resistant to abrasion. The extremely high resistance to high temperatures of aramid fibres (Kevlar), makes the braids the ideal choice for high-speed manoeuvres.

High-visibility floating mooring lines with reflective strand

REFLECTIVE STRAP　　**FLOATING**

Polypropylene lines suitable for mooring in bays and with lines on the ground. Being floating, they make it easy to manage the boat and haul it onshore. Slightly elastic, acting as mooring shock absorbers. The strand being yellow and reflective is highly visible at night to bathers and other boats.

One LED electric light complete with joystick control from the dashboard
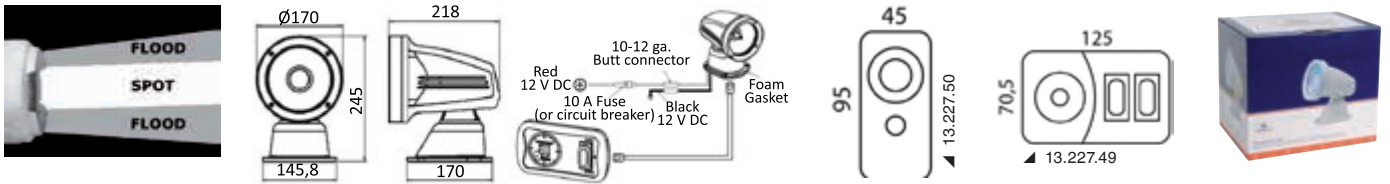

LED   **IP67**

UV-resistant Luran casing, completely watertight. Horizontal rotation 352°, vertical 50°. Dual filament LED bulb (SPOT+FLOOD) 23 W + 23 W. 3 types of optional control.
Protection against electronic interference.
Headlights can be connected to 2 types of optional controls (independent or combined) for the desired configuration:
1) Helm control with joystick. Cable included of 4.5 m. It is possible to install another joystick using the 2-port cable 13.227.51.
2) Traditional remote control with bracket for console fixing. Range up to 40 m from the lighthouse.
3) At first use, the remote control pairs with the beacon (using the instructions) and does not interfere with the electronic equipment of nearby boats; multiple remote controls can be paired with the beacon.
4) The spotlight is more responsive to commands and precise in impulse compared to the previous version.

## Aldebaran LED searchlight with joystick-operated control

OSCULATI

Body: diecast aluminium coated in white high-resistance and anti-corrosion resins. 100% watertight.
2-speed 355° horizontal rotation. 50° vertical rotation. CREE high-quality LED unit. 54W consumption corresponding to a traditional 100 W bulb.
Ensures even, wide-ranging light (60°).
Protection against electronic interference.
Headlights can be connected to 2 types of optional controls (independent or combined) for the desired configuration:
1) Console-operated joystick. 4.5-m cable included. Additional joystick controls to be installed via the 2-port cable 13.227.51.
2) Traditional remote control with bracket for console fixing. Range up to 40 m from the lighthouse.

13.273.42	12/24	36x5 W	129.6	-	2197/8796	RGBW	175x82x17

A) Models with fixed white or blue light (excluding RGBW)
Ignition through ON-OFF switch
B) RGBW Models (red/green/blue/white light)
Ignition through 4 ON-OFF switches for each color or through controller **13.237.50** via smartphone bluetooth.
The controller **13.237.50** allows:
- selecting and mixing the four basic colors (red/green/blue/white);
- adjusting light intensity;
- timing the light following the onboard music via Bluetooth.
The controller has 4 output cables for 4 colors. White is obtained also by mixing red, green and blue. In doing so the cable dedicated to the white color can be used to insert into the controller cockpit courtesy lights or other LED lights (up to a maximum of 120 W) that can be controlled, adjusted, timed, etc., via Bluetooth with a smartphone.
The controller supports up to 360 W at 12 V. If the total installed power exceeds 360 W, the system must be supplemented with an amplifier **13.273.55** for any extra 360 W.
In case of a 24V power supply system, a 24V to 12V voltage reducer (see **Victron** or similar) shall be installed upstream (for RGBW lights only) (in case of AC 220/110V - 12V systems) equal at least to the installed power. Multiple voltage reducers coupled to the light groups are also suitable (see electrical diagram).

EXIDE AGM Batteries for starting and services

NEWEST

SERVICES / SERVIZI   **STARTING / AVVIAMENTO**

No maintenance: thanks to the gas recombination technology.
Safety: 100% sealed battery avoiding acid leaks when the battery is turned upside down. The battery is absolutely airtight thanks to the VRLA safety system.
Longer duration: 3 times the life cycle of a standard lead/free acid battery (in compliance with the EN 50342-1 CCA tests). Longer duration even when idle (low self-discharge).
Starting power: higher starting power even in extreme conditions.
Vibration resistance: excellent resistance to vibration (V3 level in compliance with EN 50342-1 CCA tests).
Easy to install: easy to transport and install even in vertical position. No spilling risk.

### ROKK watertight wireless charger - 3-coil 15W

The ROKK wireless charger 15W (12/24V) allows mobile phones or tablets to be charged simply by placing them on the device.
Designed for nautical use, it is completely waterproof. IPX6 (Qi certified) has a highly non-slip and UV resistant surface.
The wireless charger features 3-coil technology that ensures a charging area over 80% larger than previous versions.
This implementation is the best one for mobiles with very powerful camera phones (15 W output power).

## ROKK wireless Cove LED watertight charger - 3-coil 15W

IPX6

It keeps phones in a safe place onboard and wireless charge them at the same time.
Tapered front design with reduced thickness, perfect for integration into consoles, bulkheads, seating, cabinetry and more.
Simply slide the phone into the pocket and instantly start wireless charging.
The internal grippy mat stops the phone sliding around making sure the phone always stays safe.
- Waterproof Rating: IPX6.
- 15W fast charging;
- Input Voltage Range: 12/24V.
- It fits any boat.
- instantly start wireless charging, no connection required.
The Cove charger features 3-coil technology that provides a charging area over 80% larger than previous versions.
This implementation is the best one for mobiles with very powerful camera phones (15 W output power).

MARCO self-priming pumps for AC systems

SELF-PRIMING   **CONSTANT FLOW**   **IP67**

For systems requiring continuous water circulation.
They ensure stable and lasting operation by automatically restoring the flow and thus avoiding the problem of system emptying caused by the vessel's oscillations due to waves and hull inclination.
Nickel-plated brass body, stainless steel shaft and **PEEK** gears, ideal for both fresh and saltwater environments, ensure high wear resistance even under severe operating conditions.

LEWMAR Ultra Low Profile Hatch

It clears your view by minimising clutter.

New ultra-low hatch that combines practicality, aesthetics, and ease of installation.

Sturdy and light frame. The hatch is placed 10 mm above the deck, turning it into a flush setup.

The cut-out dimensions align with those of Low Profile, Medium Profile, and Ocean series; this ensures easy retrofitting without modifications and additional deck drainage.

The lower frame features a silver anodised finish that ensures corrosion resistance in the harshest marine conditions.

Quick Lock - Deck Filler - User Manual

1. Install the flange paying attention to the position of the external protrusion.

2. For an ideal locking, insert the cap with the orientation above, then rotate clockwise.

3. The cap will stop in the position above and the handle can be closed.

To open the flush handle push in the indicated area, then you can easily lift it up.

VersaChock New Gen. removable dinghy supports.

MADE IN USA **UNIVERSAL**

The new generation of removable VersaChock supports is the perfect solution for storing dinghies, jet skis on stern platforms, flybridges, or decks.
It consists of 4 low and rounded-corner plates made of polished 316 stainless steel to be fixed on the boat.
The HDPE supports with a large rubber-coated resting surface are fixed to the plates by a threaded eyed pin.
Lightweight and compact supports easily removable and stowed when not in use.

Code	Version	Capacity kg	Max horizontal load kg	Note	|←——→| supports LxPxH mm
22.504.04	Universal Dinghy Chocks	900	725	Fastening screws for stainless steel plates not included. Self-tapping screws **A4-7982-06.3x"L"** or **A2-7983-06.3x"L"** are recommended.	254x178x152

*   *The length of the screw "L" must be defined based on the thickness of the plate to be drilled.*

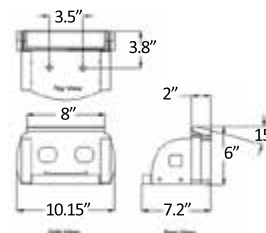

Support plates with VersaChock rollers

MADE IN USA **SELF-ADJUSTING**

They facilitate the retrieval and stowage of tenders and jet skis on the stern platforms.
Equipped with 13 cm polyethylene rollers, self-adjusting, with a range of 0-24°, adapting to the shape of the hull; the 8 cm central wheel protects the keel.
The plates are easily removable when not in use.

LCD multifunction instrument with design and electronics compatible with Yamaha/Selva outboard motors

Code   27.329.01
Multifunctional digital instrument displaying oil level, tachometer, speedometer, oil and water temperature in a single device; compatible with NMEA 2000 network and analog signal, supports 4 different analog signal inputs (Tachometer sensor, Fuel, Water temperature, and Oil pressure sensor).
There are two display options available:
Mode 1: Speed, COG, Voltage, Fuel level, Engine temperature, Oil pressure, Engine hours
Mode 2: RPM, Voltage, Fuel Level, Engine Temperature, Oil Pressure, Engine Hours
The user can set up the NMEA 2000 system or the analog signal (see installation instructions).
Protection rating: IP67
Fuel level: 0 – 190 ohm, 240 – 33 ohm or customized
Oil pressure: 10 – 185 ohm or customized
Water Temperature: 301 – 23 ohm or customized
Speed ratio: 0.5 – 250.0
Alarm functions: Fuel (10%), Water temperature (95 °C/203 °F), Oil pressure (0.7 bar / 10 psi), customizable.
Installation size: 97.5 mm
Backlit touchscreen dial (readable even in sunlight) with adjustable lighting Power supply 9/32 V.
Dial resolution 432x432 pixels.
Supplied with: 1m 5-pole NMEA cable with standard end connector, 1m 6-pole-analog cable.

OSCULATI

NMEA 2000 S3 level sensor with output signal

NMEA 2000	International flange **S3**. Suitable for systems **12 and 24V**. External protection IP65. Made of **stainless steel**.
S3	Level sensors are programmed to indicate **the use** of the tank (ex. black/grey/freshwater - fuel) and, if communicated when ordering the items, the **volume** that will be expressed in litres instead of in percentage. In case more than one tank for the same liquid is present onboard, the order shall also indicate the **numbering of the tanks** (ex. 1 - 2 - 3). All sensors can be reprogrammed (e.g., black / grey / white water - fuel) and the tank capacity can be added using the NMEA 2000 programmer (type our article **27.165.00**).

LIGHTHOUSE 3

The successor to Raymarine's award-winning Axiom® line, Axiom+ is engineered for top performance. Axiom+ comes with a powerful quad-core processor for speed and responsiveness. Designed for excellent viewing in a range of lighting conditions, the new, higher resolution IPS displays deliver 25% more brightness and new day/night color palettes offer enhanced visibility in any lighting condition. Axiom+ features the renowned LightHouse 3 OS, the most powerful and easy-to-use Raymarine MFD operating system to date.
Axiom Plus supports the renowned LightHouse 3, the most powerful and user-friendly operating system for Raymarine multifunction displays.
Distinctive features of Axiom+ range compared to Axiom range
- BRIGHTER: 25% brighter displays (up to 1,800 nit).
- SHARPER: IPS display technology delivers wider viewing angles and sharp contrast at twice the resolution of traditional displays.
- ENHANCED GPS: Next-generation, high-performance 10 Hz GPS/GNSS receiver with 4X increased sensitivity for accurate positioning.
- OPTIMISED INTERNAL GPS: 10 Hz GPS/GNSS next-generation high-performance receiver with four times higher sensitivity for accurate positioning.
- INTERNAL MEMORY: 16 GB solid state.
- INTEGRATED WI-FI MODULE for connection to Raymarine App and Internet.

I70 multipurpose RAYMARINE instrument

NEWEST

Large 4" LCD display, easy to read and perfectly visible from any angle and distance. The i70 instrument can be customized depending on the boat type. It offers traditional analogical screens as well as details about engine and fuel or information as AIS repeater: the i70 Raymarine can display all required data.
Technical data:
4" LCD display with 160° visual angles, 43-mm number in full screen mode. Anti-reflection treatment. Light House interface. AIS repeater.
Data supported: wind, speed, depth, tridata, engine (NMEA 2000), environment (NMEA 2000), fuel (NMEA 2000) and navigation.
To be connected to traditional transducers by adding a POD or to smart transducers.

SCANSTRUT

SCANSTRUT aluminium Power Tower 150 mm for Starlink

Designed to install Starlink antennas on the roof, T-top, flybridge, or boat radar arch.
This Power Tower ensures obstacle removal and positions your Starlink at an ideal angle of 8° for optimal connectivity. Designed for the marine environment, it is custom-made to fit Starlink High-Performance systems.
Pre-drilled mounting holes allow for secure attachment directly to the tower. The integrated Scanstrut cable seal ensures watertight installation. No need to remove Starlink connectors during installation. Finishing complies with the exclusive marine paint system.
Made of premium quality aluminum suitable for the marine environment.

Man Over Board based on AIS transmission

The W480 device is a MOB signalling system for personal use, class M.
Designed to be carried on life vests or oilskins. It activates within 5 seconds of falling overboard.
The in-built GPS receiver communicates the MOB position via DSC and AIS transmission.
• MOB compliant with Class M, AMRD type A
• AIS operating modes (AIS1 and AIS2, power 2 W) and DSC
• Open Loop or Close Loop (depending on the competent authority)
• MMSI programmable through application
• Service life (active): minimum 24 hours
• Inbuilt GPS receiver;
• compact and lightweight;
• Automatic and manual activation upon contact with water (very useful in case of unconscious shipwrecked);
• High-efficiency flashing light to help rescuers pinpoint the shipwreched's precise location in poor visibility or bad weather conditions.
• ready to use, no specific maintenance required;
• 5-year battery storage. Batteries are easily replaced by the final user.
The device complies with the technical standard EN 300.338-6.

Nano Aerosol Manual Fire Extinguisher

AEROSOL

This extinguisher is an innovative and safe device, based on PGA technology (Potassium-based Pyrotechnic Aerosol). Despite being compact and lightweight (480 grams), it provides extinguishing effectiveness comparable to traditional 6kg powder or foam extinguishers. It is ideal for extinguishing fires caused by fuels, electrical circuits, gas, oils, plastics, and other materials. Unlike other models, it leaves no residue, does not pollute the environment, and is safe for humans. Perfect as an additional unit for sudden emergencies.

Fixed FIREBOY fire extinguishers with clean agent and manual/automatic activation

USCG

The MA Series fire extinguishers provide optimal protection for engine rooms and motor compartments up to 51 cubic meters. This pre-engineered system ensures a total flooding, representing the safest solution to combat fires in critical environments.
- Automatic activation at 175°F (79°C): in case of emergency, the extinguisher automatically activates at a preset temperature, with the option of manual activation for additional control.
- FK-5-1-12: clean extinguishing agent, ideal for protecting delicate equipment without causing collateral damage.
- Locking lever: increases safety during cable removal or installation.
- Powder coated mounting support: includes a sturdy mounting bracket and a 2-inch LED display for immediate visual control.
- Approved by USCG (United States Coast Guard) and ISO RINA.

FIREBOY ESC series automatic engine shutdown systems

Every system in the FIREBOY ESC series includes an integrated audible alarm, charge / discharge lights, and an override switch to restart or control the automatic shutdown. They are equipped with a water-resistant display.
ESC Series includes:
ISO 54 casing: robust protection with fuses and internal terminals; Heyco connectors: reliable cable connection; variety of models with 6, 8, and 10 circuits; gold-plated relays rated at 2 A (operating from 10 mA to 2 A) and 15 A (operating from 100 mA to 20 A); multiple voltage 9-12-24-32V DC. Depending on the vessel setup, the control unit may: turn off the engines; turn off the generator; turn off the blower; turn off supply pumps; close shutters; activate alarms; perform various other functions through the relays of the control unit.

Aerosol Stick Fire Extinguisher for Electrical Panels

AEROSOL

Adhesive stick fire extinguisher employing aerosol technology, activates at 170°C, ideal to fight fires caused by short circuits in reduced spaces such as electrical panels and engine compartments of boats. Non-toxic, non-pressurized, leaves no residue, and is easily installed. Protects up to 0.3 m³.

Pearl stainless steel lever latch

AISI 316 **MADE IN ITALY** **PATENT PENDING**

The operating mechanism is enclosed within the main casing, thus presenting an impeccable **aesthetic** result. Features an intermediate elastic system that allows for a consistently usable and pleasant trigger tension, capable of compensating for any variations that may occur during work. It is entirely made of stainless steel **AISI 316**, mirror-polished finish on the outside and a bright finish on the inside.
For the latch fastening, what follows is required:
- 2 M4 countersunk screws for the base plate,
- 2 M5 rounded head screws for the hooking tooth.

Self-supporting hinge

AISI 316   **FRICTION HINGE**

Made of precision-cast AISI 316 stainless steel.
Constant torque 30 **kg·cm** ± 15% guaranteed for 20,000 cycles.
The torque is expressed in **kg·cm,**, meaning that departing from the hinge rotation axis, the effort decreases.
Torque calculation: hatch depth (cm) x 1/2 hatch weight (kg).
Example: 2x 30-kg hinges perfectly hold a hatch 2-kg heavy and 40 cm deep.

Push closure with Grabber hook

The latch closure is facilitated by the use of a mechanism with a relatively low profile (only 13.7 mm thick). The actuation above the dead point firmly compresses the door, releasing the compression upon opening.
Features:
- The latches can be mounted vertically or horizontally, the marks on the latch and the hook are a reference for correct mounting.
- Available in various mounting options: the hook can be installed in front of or beside the frame.
- All models have three clamping forces: 13 N, 22 N and 44 N.
- All models are made of corrosion-resistant materials.

Cam latch for stern door

Code   38.356.01
Suitable for applications that require quick access without locking, such as compartment doors, fly bridges, or refrigerators.
Made of stainless steel AISI 316 with electro-polished finish, corrosion resistance.
Features:
- No access restriction.
- Opening to the right or left, outward or inward.
- Latch stay provided: push-button handle.
- Handle provided: standard handle.
southco

Talon sliding entrance door lock

Latch for doors intended for internal or external applications. Mechanisms with positive latch keeping the doors closed even in the most extreme conditions.
Features:
- No access restriction.
- Opening to the right, outward.
- Type of bolt: short.

ATOM TECNOSEAL Cathodic protection monitoring system

TECNOSEAL
save your dreams

NMEA PROTOCOL

NEWEST

Electrochemical potential monitoring system used to continuously measure the cathodic protection conditions of submerged and semi-submerged metal appendages.
To be installed in control panels having IP64 protection rating on the front, on hulls of any material.
From a minimum of 1 to a maximum of 6 measurement points applicable.
It is available with two different probes complete with thru-hull fittings (3/4" in bronze) for monitoring:
- Pure zinc probe: more economical version suitable for medium boats. The zinc will need to be replaced every 2/3 years.
- Silver and silver chloride probe: premium version with several years of durability.
Technical features of the screen:
- 4.3" TFT LCD screen, high brightness
- Resolution 480x272 pixels
- Spark plugs 700
- Resistive touch screen
- Power supply 12/24 V - <500mA
- Dimensions 118x78x32 mm
- Drilling template 107x67 mm
- Operating temperature -20 +70 °C
- Front material and casing: ABS
- Weight 200g

E-STEP electric ladder

PATENT	ELECTRIC

Electric under-platform ladder with innovative and patented pantograph system.
Made of lightweight aluminium alloy to ensure the correct strength and lowest possible weight. The steps are covered with a non-slip EVA layer to ensure comfort and safety.
Powder-coated in glossy black, it is available in two versions with 3 or 4 steps.
The first step of the ladder is designed to protrude forward, allowing back installation with respect to the transom.
The "all-in-one" ladder with quick installation and IP69K motor is provided with a dedicated control panel for operation.
Extremely low-noise and quick to fold and unfold in 12 seconds.
It is a patented and innovative product, 100% Made in Italy, that bridges the gap between mechanical climbing ladders and expensive electric gangways.
Possible customizations on request: color of steps.

Not more a ladder but a true stairway.

E-Step it's the electrical ladder that fills the gap in the nautical market between manual ladders and expensive gangways. Available in 3 or 4 steps.

DAME NOMINATED 2024

ATTWOOD retractable stern ladders

Designed to integrate into the stern platforms with a negative 15° tilt, they are completely hidden from view when closed.
The only visible element is a simple faceplate with integrated locking and release mechanism.
The ladder opens instantly and easily with one hand, both onboard and in the water
Once removed from the storage tube, the sturdy molded plastic steps automatically fold back, creating a convenient and safe ascent system.

DOMETIC drawer refrigerators

Innovative design and high energetic efficiency for a 3-in-1 cooling solution: refrigerator only, freezer only, or both.
The freezer compartment can be easily pulled out to make room for a larger refrigeration.

- Touch control panel with integrated LED light bar;
- Reversible door hinge;
- Full-width door handle neatly integrated for easy access;
- Smart closing mechanism to create a gap between the fridge and the door to airing out;
- Energy-efficient, light, compact compressor with 3 operating modes (Eco/Boost/Silent);
- Compressor can be remote-controlled in the 35-litre version to reduce depth to minimum;
- Standard or flush-mount installation frame.

ISOTHERM Cruise Classic Total Black refrigerators

isotherm

CRUISE Classic Total Black series features stylish and sturdy refrigerators, perfect for the marine environment. Available in capacities from 42 to 226 litres, they combine modern design in matt black and high energy performance.

- Integrated freezer (Drink version excluded).
- LED internal lighting.
- Refrigerator inner panels with rounded corners for easy cleaning.
- Secop energy-efficient 12/24 V compressor
- Door with magnetic lock.
- Corrosion-resistant materials.

Autoterm Flow liquid heaters

AUTOTERM Flow liquid heaters are a versatile and compact solution for boats and vehicles, with a thermal power of 5 kW. Designed to heat cabins and interiors. Available for petroleum (12V) and diesel (12/24V) systems. The kit contains everything necessary for the installation of the boiler. Control panel **50.251.01** to be purchased separately to operate the boiler. To complete the installation, it will also be necessary to purchase the hot water circulation pipe (diameter 16mm type **17.740.16**) and the local air distributions as needed.
The following accessories are included in the kit: Thermal insulation; Fuel pump clamp with rubber gasket; Fuel pump; Electrical wiring for the pump; Electrical wiring for control panels; Air intake hose with filter; 1 meter long exhaust pipe (optional adapters: **50.255.01/02/03**); 5.5 meters of nylon fuel hose; Nylon fuel hose cover; Mounting bracket for the pump; Silencer with mounting kit; Heat cover for exhaust pipe; Electric liquid pump; Coolant hose connector; L-shaped exhaust pipe adapter; 2 meters of coolant hose.

IZY Air Conditioning Unit supplied in ALL IN ONE Kit

thermowell®

NEWEST

IZY is the exclusive product designed for DIY installation of air conditioning system in any boats by people without technical background.
The durable and room-saving 316 stainless steel casing internally insulated for noise emission reduction contains:
- a high-efficiency compressor;
- a corrosion-resistant copper-nickel heat exchanger;
- a refrigerant gas-air heat exchane coil;
- a seawater circulation pump;
- all electrical and electronic components.
The heating mode is activated through an electric resistance, unlike heat pump systems.
With cycle reversal. The air conditioner efficiency is not affected by the decreasing of sea water temperature in winter, thus achieving 100% of the available thermal power even with water temperatures below 10°C.
Power supply 220V. Digital wall-mounted control panel, remote control included.
* Air distribution kit and seawater recirculation **OPTIONAL** to be ordered separately code

AirJet air conditioners 12V and 24V DC

NEWEST

AirJet 12/24V DC is ideal for air conditioning of boats and leisure vessels without a generator. Directly powered by the onboard battery bank, it allows for air conditioning without the need for noisy generators or inverters.
Thanls to its compact and elegant design, AirJet stands out for its high versatility, easy and room-saving installation.
It is ideal for cooling single cabins.
When the boat is moored, the special kit (optional) can be connected to the dock and benefit from the 220V power supply, saving the onboard batteries.
Sea pump and control panel included.
* Air distribution kit and seawater recirculation **OPTIONAL** to be ordered separately code

LENCO Pro Control Standard Mount and Edge Mount Trim Tab Kit

Next-generation flap system with advanced controller and control unit, fast and sturdy pistons for an excellent driving experience.

Faster and more powerful actuators developed in 2025 to ensure maximum trim correction performance in modern boats.
Piston pulling and pushing power 750/400 Kg versus 340/0 Kg of the previous version.
5 years of warranty on the complete system.
74% improvement in boat balancing by maintaining the hull at the optimal angle of heel despite moving weights or rough sea.
24% less impact on water makes navigation more pleasant and smooth.
Compatible with all engines equipped with a control unit. If Mercury engines are installed on the vessel, the system, through connection to the Mercury JBox, will be able to acquire more data and thus intervene to make navigation even more predictive and comfortable.
All models operate at 12v
The position of the flaps can be displayed on any "MFD" (multifunction display)

Auto Version:
When in 'auto' mode, the measurement unit interprets navigation conditions such as speed, accelerations, pitching, and rolling, and responds promptly by maintaining and keeping the hull at the best navigation angle.
The pilot can still intervene and adjust the trim differently by using the intuitive ergonomic panel.

Assist Version:
Allows for intuitive and quick control of the trim by the pilot. Possibility to program and quickly recall two desired Flap positions.

The kit includes:
•   Pro Control Auto or Assist ergonomic control panel
•   Detection control unit (IMU) (**only for Auto version**)
•   2 steel fins
•   2 SD Pro actuators cylinders having 10" pin-to-pin length (15187-001)
•   6 T-connectors (30281-001)
•   Micro C Drop cables: 2x 1.8m (30269-002); 1x 3.8m (30269-001); 1x 6.4m (30269-004)
•   2 x 6 Pin Detusch to Micro C Actuator Network Adapter Cable (30377-001)
•   2x 0.91m Pro Control Actuator Power Pigtail (30378-001)
•   2 Wake Signal Adapter for Non-Mercury Systems (30376-001)
•   2 x boat side mounting bracket (15193-101)
•   2 x mounting brackets for flaps (15194-101)
•   Lenco 2K Backbone Kit

Rubber stuffing box

Long lasting insulation from water seepage, low maintenance required if correctly treated.
Made of a special type of rubber resistant to salt water and lubricating grease.
The product is supplied with an AISI316 stainless steel clamp and specific lubricant for shaft line.
Operation of the stuffing box is usually under the waterline; lubrication and cooling by water. In case of operation above or on the waterline, an external water cooling source is needed.

Version A: brass hose adaptor for external lubrication by water (if not used, a brass closing cap is supplied) + greasing aperture with brass cap.
Version B: no hose adaptor and greasing aperture.

The kit includes: stuffing box + specific lubricant tube + instructions.

FLIPPER™ foldable winch handle

FOLDABLE   **MADE IN ITALY**

Flipper is an innovative foldable winch handle designed to simplify and speed up sheets release and wrap without removing the handle from the winch.
Precision milling and stainless steel joints ensure resistance and durability. 30- micron anodization process to enhance scratch resistance and withstand the aggressive marine environment.
Easily foldable onto the winch base thanks to its patented locking mechanism for easier release and wrap.
Adjustable in 4 positions (closed, semi-open, open, maximum opening with ratchet) to simplify any maneuvering requirements. Equipped with a quick 8-point hook and release for immediate installation on any type of winch.
With Flipper you no longer have to remove the handle and mount it on different winches. No more fear of losing it at sea: it is always in place and ready for use. This reduces the risk of losing Flipper in the sea and simplifies maneuvers, making your sailing experience safer and more comfortable.

MARLIN Yacht Paints

MARLIN Velox Super antifouling paint

Specific product for submersed metal parts such as propellers, stern drives, shaft lines, etc.
It does not degrade with galvanic currents, which are the major cause of paint peeling.
Velox Super is the evolution of the well-known Velox Plus and is approved in compliance with BPR directive, also for DIY use (in Italy).
The addition of new additives and TEFLON have improved the adhesion properties for better smoothness and easier cleaning.

MARLIN Yacht Paints

MARLIN Flexy antifouling paint

Flexible antifouling paint suitable for the protection of inflatable boat tubes (neoprene, hypalon, pvc, vinyl leather, etc.).
It can also be applied on fiberglass hard keels.
No primer needed on either fabric or fiberglass.
Excellent adhesion, effectiveness and flexibility.

Code	Colour	Package l
65.889.01	□ white	0.5
65.889.02	■ grey	0.5
65.889.03	■ Black	0.5

MARLIN Universal Primer

This primer is ideal to isolate old antifouling in bad or unknown conditions before applying a new antifouling paint.
High water resistance and corrosion protection, ideal to isolate iron or wood in mono-component cycles.

Code	Colour	Package l
65.882.01	grey	0.75
65.882.02	grey	2.5
MARLIN Epogel protective paint

Epoxy solventless coating resistant to chemicals for interior use.
Ideal to paint bilges as it stops osmosis caused by water absorption from inside the hull.
Certified for food and drinkable water contact, it can be used in refrigerators and drinkable water tanks.

MARLIN Velox Sil Antifouling paint for propellers and metal parts

Foul-release **transparent, biocide-free antifouling. For excellent adhesion, apply the specific modified epoxy primer first, grey color.**
The combination of Primer Sil and Velox Sil ensures exceptional adhesion to metal parts, optimal resistance to galvanic currents, high speeds, and cavitation, without peeling. Easy to use and does not contain carcinogenic or particularly dangerous substances. Suitable for DIY use.

Code	Description	Content

65.897.02	250 ml Kit

MARLIN Eco Sil antifouling paint for echo sounder transducers

Biocide-free transparent foul-release antifouling paint. It provides strong adhesion on plastic, does not interfere with the echosounder signal.
The solvents in the paint do not attack either the plastic or the seals.
Any vegetation growth will be removed by the motion of the boat or through light cleaning using a sponge.
A small brush for application is included.

## High-pressure electric inflater with GE 22 RC remote-controlled compressor

It consists of a pumping unit to be located in a protected housing and a control panel that can be positioned in a different place depending on your boat (tender garage, stern gangplank, boat deck). The 5-m long hose and cables connecting the pump to the panel are included.
The function (inflation/deflation) and the pressure needed can be selected on the control panel, where the inflating mouth is located.
Connect one end of the inflation hose to the control panel and the other end to the dinghy and press ON to start the pump.
The remote-controlled pump drastically reduces noise during operation.
High-performance pump for fast and high-pressure inflation.
For dinghies, ribs, SUPs, etc.

ATMOS Integrated Air Station 12V

| IPX6 | INFLATE/DEFLATE | IGNITION PROTECTION |

The built-in ATMOS onboard inflator combines a high airflow able to reach high pressures (20 psi / 1.37 Bar). Suitable for any type of inflatable: tender, SUP, towables
Waterproof (IPX6) and designed to withstand harsh marine environmental conditions.
The next-generation technology provides fast and effortless inflation and deflation.
Compact and flat, ATMOS fits almost all panels on board. It comes with inflation tube (2.5 mt.) and a universal valve fittings kit.
User-friendly and ready for use: you just have to set the target pressure on the display and start it. The inflator automatically stops when the desired pressure is reached.
ATMOS is ignition protection certiifed (ISO 8846), allowing the inflator to be installed near boat areas containing flammable gases or fuel. It complies with EMC CE-RED directive (2014/53/EU) and EN 62368 standard.
Comes with a comfortable and durable Storage Bag complete with accessories.
Average inflation time for SUP: 6-8 minutes.
Certifications: CE, ROHS, UN ECE R10, UKCA
Compliant with standards: ISO 8846 and SAE J1171

OSCULATI GADGET and CLOTHING line

Promotional items will be sent by our sales department upon request. Please state the code of the item you wish to receive.

CLASSIC T-SHIRT

70.190.08-21MB
Crew neck short sleeve T-shirt.
Colour: blue.
Fabric: 100% cotton, 160 g.
Model: Unisex.
Available sizes: XS, S, M, L, XL, XXL, XXXL.

CLASSIC POLO SHIRT

70.190.01-21MB
Short sleeve two button polo shirt, side slits.
Ribbed collar and sleeves. Colour: blue with
white inserts. Fabric: 100% cotton piquet, 190 g.
Model: Unisex.
Available sizes: XS, S, M, L, XL, XXL, XXXL.

SHOPPING BAG

70.199.15-01
Reusable shopping bag
made of H.D. 02 white,
fold-over die cut bag. 70 My.
Dimensions: Ø 35×55x20 cm.

SHOPPING BAG WITH SHOULDER STRAP

70.199.21
Non-woven fabric shopping bag,
120 g., additional matt lamination
and cardboard bottom.
Dimensions: 37x30x0.8 cm +
shoulder strap 115x8 cm.

SPORT BLUE POLO SHIRT

MAN: 70.190.01-21MR
WOMAN: 70.190.01-21WR
Short sleeve two button polo shirt, side slits.
Red band under the collar. Ribbed collar and
sleeves. Fabric: 100% cotton piquet, 190 g.
Colour: blue with red inserts. Available sizes:
MAN XS, S, M, L, XL, XXL, XXXL.
Available sizes: WOMAN XS, S, M, L, XL, XXL.

SPORT WHITE POLO SHIRT

MAN: 70.190.01-21MW
WOMAN: 70.190.01-21WW
Short sleeve two button polo shirt, side slits.
Ribbed collar and sleeves.
Fabric: 100% cotton piquet, 190 g.
Colour: white with blue inserts. Available sizes:
MAN XS, S, M, L, XL, XXL, XXXL.
Available sizes: WOMAN XS, S, M, L, XL.

THERMAL CUP/ WATER BOTTLE

#BLUEPLANET

70.199.26-21MR
Made of SS, anti-slip rubber
finishing. Keeps temperature
up to 90 min.
Colour: red.
Capacity: 450 ml.

BADGE LANYARDS

70.199.20
Neck badge satin
lanyard with
standard
shackle.
Colour: red. Dimensions:
2x47 cm.

KEYRING

70.199.16-210
Floating keyring.
Material: EVA 12 mm +
central support in white PVC.
White lanyard with 3 cylinders
(blue, white, red) in EVA + metal ring
Measures: 6x10 cm.

CLASSIC SWEATSHIRT

70.190.11-21MB
Full zip two pocket sweatshirt. Ribbed hem
and cuffs. Colour: blue with white inserts.
Fabric: 70% cotton 30% polyester, 330 g.
Model: Unisex.
Available sizes: XS,S,M,L,XL,XXL,XXXL.

CLASSIC SOFTSHELL

70.199.40
Three pocket softshell.
Colour: blue with white and red inserts.
Fabric: 310 g.
Model: Unisex.
Available sizes: XS,S,M,L,XL,XXL,XXXL.

FLAG

Print with perimeter stitching and two
laces on the two corners. Material: 115
gr windproof nautical cloth.
70.199.23: Rectangular (100x150)
70.199.23-04: Rectangular (220x150)

Sublimatic printing, complete with
rod, round steel base and bag.
Outdoors and indoors. Material:
Windproof nautical towel 110 gr.
70.199.23-01
Small drop (95,7x216,5 cm)
70.199.23-02
Large drop (122,9x301,3 cm)
70.199.23-03
Large sail (91,2x346 cm)

CLASSIC CAP

70.190.04-21B
Cap with DRY-TECH inner lining, suitable for
outdoor sports. Pre-curved brim and
embroidered eyelets. Closure: velcro and
PVC strip. Colour: blue. Fabric: UPF50+,
75% nylon, 20% cotton, 5% elastam
Model: Unisex. One size fits all

SPORT CAP

70.190.04-21W
Cap with pre-curved brim, embroidered
eyelets and eyelet for lanyard attachment.
Closure: velcro.
Colour: white with blue and red inserts.
Fabric: 100% cotton. Model: Unisex.
One size fits all

STICKERS

70.199.12-01 (20x16 cm) 2 pcs
70.199.12-02 (40x4,2 cm) 2 pcs
70.199.19 (corner 45x42 cm) 1 pcs
PVC sticker with Osculati logo.

BALL PEN

70.199.25-21BR
Metal ball point with blue or
red
refill and touch pen tip. Sold in
the two colours
depending on availabiliy.
Dimensions: Ø 8x142 mm.

Osculati x **One Ocean Foundation**

One Ocean Foundation was established with the aim of accelerating solutions to ocean problems by inspiring international leaders, promoting a sustainable blue economy, and improving ocean literacy. Over the past four years, One Ocean Foundation has collaborated with high-level institutions, research centers, and universities.

Osculati is proud to have supported the research project for the repopulation of Posidonia "Blue Carbon Project", aimed at restoring the Posidonia oceanica meadow in the seabed of the Marine Protected Area of Isola di Bergeggi (Savona) in Liguria, thus contributing to the conservation of our precious marine ecosystem.

Here are some of the project achievements:

Quarterly site monitoring showed an excellent **survival rate of 81% for the transplanted seedlings**, one year after the intervention.

The mats used in the transplant are well anchored, and the seedlings successfully **resisted the strong winter storms.**

In April, we organized the **first educational activity,** involving about 40 students from the Bergeggi elementary school.

The documentary on the project was presented at the Riviera Film Festival and during **One Ocean Week Milano,** generating great interest.

The first scientific article on the Posidonia oceanica reforestation project **has been published,** documenting progress and challenges.
